International Journal for NUMERICAL METHODS IN ENGINEERING

Editors

Professor O. C. Zienkiewicz, School of Engineering, University of Wales, Swansea, U.K.

Professor R. H. Gallagher, Dean, College of Engineering, University of Arizona, Tucson, Arizona, U.S.A.

Associate Editor

Dr. R. W. Lewis, School of Engineering, University College of Swansea, U.K.

Advisory Editorial Board

J. F. ABEL
Department of Structural Engineering,
Hollister Hall, Cornell University,
Ithaca, NY 14853, U.S.A.

R. J. ALLWOOD
Reader in Structural Analysis,
Department of Civil Engineering,
University of Technology,
Loughborough, Leicestershire, U.K.

J. L. ARMAND
Institut de Recherches
de la Construction Navale,
47 rue de Monceau, 75008 Paris, France.

T. BELYTSCHKO
Professor, Department of Civil
Engineering, Technological Institute,
Northwestern University, Evanston,
Illinois 60201, U.S.A.

P. G. BERGAN
Associate Professor of Civil Engineering,
Division of Structural Mechanics,
The Norwegian Institute of Technology,
7034 Trondheim — Nth, Norway.

J. F. BESSELING
Professor,
Technische Hogeschool Delft,
Delft, Holland, Mekelweg 2.

J. M. BOISSERIE
Ingénieur Chercheur à Electricité
de France 6, quai Watier, 78400,
Chatou, France.

A. CASSELL
Department of Civil Engineering,
Imperial College of Science
& Technology, Imperial Institute Road,
London, S.W.7.

A. CELLA
Senior Research Scientist,
Istituto di Elaborazione dell'
Informazione,
Consiglio Nazionale delle Ricerche,
Via S. Maria, Pisa, Italy.

P. G. CIARLET
Professor, Analyse Numérique,
Université Pierre et Marie Curie,
Tour 55–65—5^{e} étage,
4, place Jussieu,
75230 Paris Cedex 05, France.

R. W. CLOUGH
Professor of Civil Engineering,
University of California, Berkeley,
California 94720, U.S.A.

R. D. COOK
Professor,
Department of Engineering Mechanics,
2312 Engineering Building,
1425 Johnson Drive,
University of Wisconsin,
Madison, Wisconsin 53706, U.S.A.

B. A. FINLAYSON
Professor of Chemical Engineering,
University of Washington,
Seattle, Washington 98105, U.S.A.

H. D. HIBBITT
Consultant, R.F.D. 3,
Box 277, North Scituate,
Rhode Island 02857, U.S.A.

T. J. R. HUGHES
Associate Professor,
California Institute of Technology,
Pasadena, California 91125, U.S.A.

H. A. KAMEL
Professor, Department of Aerospace &
Mechanical Engineering,
The University of Arizona,
Tucson, Arizona 85721, U.S.A.

T. KAWAI
Professor, Institute of Industrial Science,
University of Tokyo, Japan.

V. KOLAR
Professor of Structural Analysis,
Technical Institute Dopravoprojekt,
602 00 Brno, Sedlakova 28,
Czechoslovakia.

G. MAIER
Professor of Structural Engineering,
Polytechnic of Milan,
Milano 20133, Italy.

H. A. MANG
Technical University of Vienna,
Vienna, Austria

P. V. MARCAL
President, MARC
Analysis Research Corp.,
260 Sheridan Avenue
Suite 314, Palo Alto,
California 94306, U S.A.

J. L. MEEK
Reader in Civil Engineering,
University of Queensland,
Brisbane, Queensland, Australia.

A. R. MITCHELL
Professor of Mathematics,
University of Dundee, Scotland.

Z. MROZ
Polish Academy of Sciences,
Institute of Fundamental
Technological Research,
Swietokrzyska 21, Warsaw, Poland.

G. C. NAYAK
Professor of Civil Engineering,
University of Roorkee,
Roorkee (U.P.), India.

J. T. ODEN
Professor of Engineering Mechanics,
Department of Aerospace Engineering
and Engineering Mechanics,
The University of Texas,
Austin, Texas, U.S.A.

M. D. OLSON
Associate Professor,
Department of Civil Engineering,
University of British Columbia,
Vancouver, Canada.

T. H. H. PIAN
Professor of Aeronautics and Astronautics,
Massachusetts Institute of Technology,
Cambridge, Massachusetts 02139, U.S.A.

P. J. ROACHE
Consultant, 4925 Kathryn Circle, S.E.,
Albuquerque,
New Mexico 87108, U.S.A.

E. Y. RODIN
Professor, Department of Systems
Science & Mathematics, Box 1040,
Washington University, St. Louis,
Missouri 63130, U.S.A.

A. SAMUELSSON
Professor of Structural Mechanics,
Chalmers Tekniska Högskola,
(S-402 20) Göteborg 5, Sweden.

G. SANDER
Laboratoire d'Aeronautique,
Universite de Liege,
75 Rue du Val Benoit, Liege, Belgium.

L. A. SCHMIT
Professor of Engineering,
University of California,
Los Angeles, California 90024, U.S.A.

G. STRANG
Professor of Mathematics,
Massachusetts Institute of Technology,
Cambridge, Massachusetts, U.S.A.

C. W. TROWBRIDGE
Head of Computing Application,
Technology Division,
Rutherford Laboratory,
Chilton, Didcot, Oxon, U.K.

G. WARBURTON
Professor of Applied Mechanics,
Department of Mechanical Engineering,
University of Nottingham,
Nottingham, U.K.

K. WASHIZU
Professor of Aeronautics and Astronautics,
University of Tokyo, Japan.

A. WEXLER
Professor
Department of Electrical Engineering,
The University of Manitoba,
Winnipeg R3T 2N2, Canada.

W. WUNDERLICH
Professor, Ruhr-Universität Bochum,
Institut für Konstruktiven Ingenieurbau,
Lehrstuhl IV, Postfach 10 21 48,
463P Bochum 1, West Germany.

Y. YAMADA
Professor, Institute of Industrial Science,
University of Tokyo, Japan.

International Journal for

NUMERICAL METHODS IN ENGINEERING

Issue No. 1, 1978

J. F. Polk and P. P. Lynn: A Least Squares Finite Element Approach to Unsteady Gas Dynamics 3

E. A. Rukos: Continuous Elements in the Finite Element Method 11

A. K. Gupta: A Finite Element for Transition from a Fine to a Coarse Grid . . . 35

P. R. Dawson and E. G. Thompson: Finite Element Analysis of Steady-state Elasto-visco-plastic Flow by the Initial Stress-rate Method 47

T. P. Rich: Closed Form Elastic-plastic Stiffness Matrix for Axisymmetric Finite Elements 59

M. E. Laursen and M. Gellert: Some Criteria for Numerically Integrated Matrices and Quadrature Formulas for Triangles 67

J. A. Marshall and A. R. Mitchell: Blending Interpolants in the Finite Element Method 77

R. B. Deshpande: Certain Properties of Numerical Schemes Used to Solve the Blade-to-blade Flow Problem 85

R. D. Shaw and R. G. Pitchen: Modifications to the Suhara-Fukuda Method of Network Generation 93

M. Gotoh: A Finite Element Formulation for Large Elastic-plastic Deformation Analysis of Polycrystals and Some Numerical Considerations on Polycrystalline Plasticity 101

M. Kawahara and K. Hasegawa: Periodic Galerkin Finite Element Method of Tidal Flow 115

J. P. Kernevez, C. Knopf-Lenoir, G. Touzot and G. Verchery: An Identification Method Applied to an Orthotropic Plate Bending Experiment 129

A. Jennings and G. M. Malik: The Solution of Sparse Linear Equations by the Conjugate Gradient Method 141

F. M. El-Amin and M. A. Kasem: Higher-order Horizontally-curved Beam Finite Element Including Warping for Steel Bridges 159

M. B. Kanchi, O. C. Zienkiewicz and D. R. J. Owen: The Visco-plastic Approach to Problems of Plasticity and Creep Involving Geometric Non-linear Effects 169

SHORT COMMUNICATIONS

R. A. Brockman: Discussion of a Paper by E. O. Frind 183

E. O. Frind: Author's Reply to R. A. Brockman's Discussion 185

D. K. Gartling: Some Comments on the Paper by Heinrich, Huyakorn, Zienkiewicz and Mitchell 187

O. C. Zienkiewicz: Reply to Comments by Gartling on Paper by Heinrich, Huyakorn, Zienkiewicz and Mitchell 191

BOOK REVIEW 192

Issue No. 2, 1978

Erratum 194

H. Tottenham and S. Y. Barony: Mixed Finite Element Formulation for Geometrically Non-linear Analysis of Shells of Revolution 195

I. Cormeau: Elastoplastic Thick Shell Analysis by Viscoplastic Solid Finite Elements . 203

B. Hunt: Finite Difference Approximation of Boundary Conditions Along Irregular Boundaries 229

P. Silvester: Construction of Triangular Finite Element Universal Matrices 237

D. K. P. Yue, H. S. Chen and C. C. Mei: A Hybrid Element Method for Diffraction of Water Waves by Three-dimensional Bodies 245

R. P. Mattione, I. N. Katz and M. A. Franklin: A Partitioned Parallel Runge–Kutta Method for Weakly Coupled Ordinary Differential Equations 267

M. Stern and E. B. Becker: A Conforming Crack Tip Element with Quadratic Variation in the Singular Fields 279

R. C. Kelahan and J. L. Gaddy: Application of the Adaptive Random Search to Discrete and Mixed Integer Optimization 289

E. J. Haug, Jr. and T.-T. Feng: Optimal Design of Dynamically Loaded Continuous Structures 299

S. Ramamurthy: Optimum Design of Prestressed Concrete Slabs Using Primal Geometric Programming 229

K. Dems and Z. Mróz: Multiparameter Structural Shape Optimization by the Finite Element Method 247

A. Miele, A. Mangiavacchi, B. P. Mohanty and A. K. Wu: Numerical Determination of Minimum Mass Structures with Specified Natural Frequencies 265

J. Kiusalaas and R. C. J. Shaw: An Algorithm for Optimal Structural Design with Frequency Constraints 283

R. A. Gellatly, R. G. Helenbrook and L. H. Kocher: Multiple Constraints in Structural Optimization 297

Y. W. Chun and E. J. Haug: Two-dimensional Shape Optimal Design 311

H. Miura and L. A. Schmit Jr.: Second Order Approximation of Natural Frequency Constraints in Structural Synthesis 337

F. Y. Cheng and D. Srifuengfung: Optimal Structural Design for Simultaneous Multi-component Static and Dynamic Inputs 353

J.-L. Armand and B. Lodier: Optimal Design of Bending Elements 373

G. Sander and C. Fleury: A Mixed Method in Structural Optimization 385
